The stamp to use on glossy paper, photos plastic, wood, fabric and leather

Uses ultifast ink - a water resistant fast drying alcohol based ink that dries by evaporating on the surface of the paper

Please enquire to find out which type of stamp and ink will work best for you if you are trying to stamp unusual surfaces - it may be necessary to trial the ink

You will also need to purchase some **ultifast ink** (\$19.80 for 6ml)

to reink the multisurface self inking stamp

Check the stamp periodically

and reink when it starts to dry out

(3-20 drops depending on the size of the stamp)

DO NOT forget about the stamp for 6 months

(it may be hard to reink if it dries out)

**EA 70MS** 14x39mm **\$56.10**

**EA 75MS** 15x46mm **\$58.30**

**EA 110MS** 17x57mm **\$62.15**

**EA 150MS** 22x64mm **\$70.40**

**EA190MS** 30x70mm **\$78.10**

		<b>\$73.70</b>
<b>EA 140MS</b>	30x52mm	
<b>EA 165MS</b>	38x64mm	<b>\$78.10</b>

An alternative if you need to mark glossy or non-absorbent materials or frozen food labels is to use a traditional **non self inking handstamp** with a separate dry stamp pad.

You need to ink the pad

up with a small portion of special ink such as multipurpose ink (\$18.70 for 50ml) just prior to use

- then stamp everything in the one session

The fast drying inks dry by evaporation on the materials surface

(so the ink on the pad will also evaporate)

This is also a great way to stamp dates and batch numbers on glossy materials (using handheld daters and numberers)
