49x27mm **\$58.30**

IS18MS 61x22mm **\$60.50**

IS23MS 71x26mm **\$64.90**

IS25MS 73x38mm **\$69.85**

You will also need to purchase some ultrafast ink (\$16.50 for 6ml) to reink the multisurface self inking stamp
Check the stamp periodically and reink when it starts to dry out (3-20 drops depending on the size of the stamp)

Ultrafast Ink Colours: black blue red

An alternative to using a self inking multisurface stamp if you need to mark glossy or non-absorbent materials is to use a dry stamp pad and a traditional handstamp

You need to ink the pad up with a small portion of special ink such as multipurpose ink (\$16.50 for 50ml) just prior to use -then stamp everything in the one session
The fast drying inks dry by evaporation on the materials surface ie. the ink on the pad will also evaporate

Please enquire to find out which type of stamp and ink will work best for you if you are trying to stamp unusual surfaces - it may be necessary to trial the ink
